FREE GUIDE FOR STUDENTS

Jadual Playbook

A friendly tour of every part of Jadual. Type your timetable once, then see it on every screen you use.

your lock screen, but make it pretty

1.6.2
OCT 2026

English edition for Jadual 1.6.2. Free to read and free to share.

BEFORE YOU START

How to read this book

You don't have to read this front to back. Each chapter covers one part of the app, and the numbered circles on every screenshot match the numbered list beside it.

What the little labels mean

FREE Works for everyone. There is nothing to buy.

PRO Part of Jadual Pro. You can still see these features in the app, but they ask you to unlock them first.

TIP

A shortcut, or a smarter way to do something.

HEADS UP

A common stumbling block, and how to avoid it.

WEEKLY ROUTINE MODE

Jadual has two kinds of timetable. This book follows **University or school**. Notes like this one begin with **For Weekly routine mode**, and Chapter 3 covers that mode from start to finish.

Jadual needs Android 10 or newer. Android's own menus vary a little between phone brands, but the Jadual screens look the same on all of them.

Inside

1 Your first timetable 3

8 Notes 24

9 Backup and moving phones 27

10 Quick fixes 28

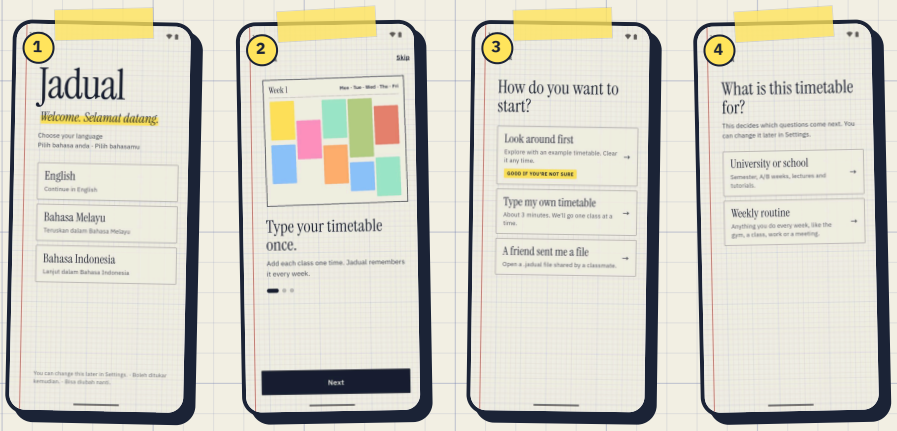

nobody reads a guide front to back. skip around!

CHAPTER 1

Your first timetable

start here!

The first time you open Jadual, a short setup walks you through everything. It takes about three minutes, and you can change any answer later.

1. **Choose your language.** You can pick English, Bahasa Melayu or Bahasa Indonesia, and switch whenever you like in Settings.
2. **Three short slides** explain the idea. To jump straight in, tap **Skip**.
3. **How do you want to start?** *Look around first* loads an example you can clear any time. *Type my own timetable* starts your real one. *A friend sent me a file* opens a shared .jadual file.
4. **What is this timetable for?** Choose *University or school* if you have a semester and lectures. Choose *Weekly routine* for anything that repeats every week, such as the gym or work.

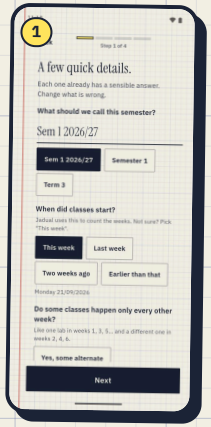

TIP

Not sure yet? Choose **Look around first**. You can explore the example, then clear it with one tap when you are ready.

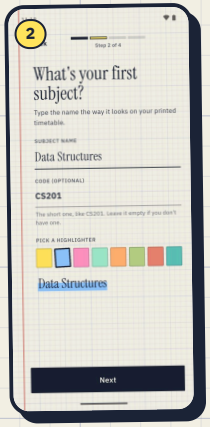

CHAPTER 1

Add your first class

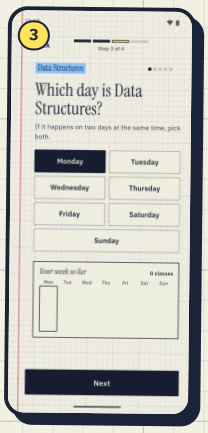

Setup asks one small question at a time, and a panel called **Your week so far** fills in as you answer.

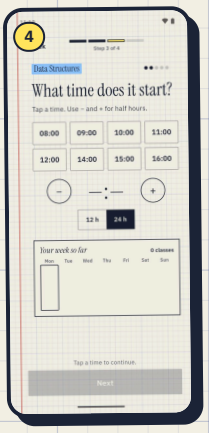

Name it
Name the semester and say when classes started.

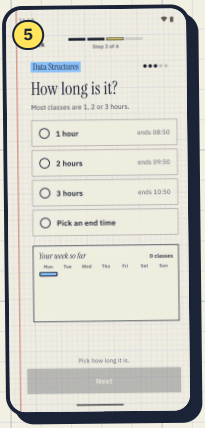

First subject
Type a name, add a code if you like, pick a colour.

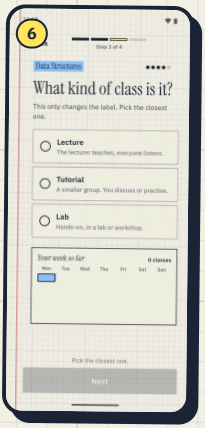

Which day?
Choose the day, or both days if it meets twice.

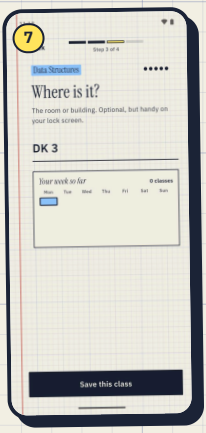

Start time
Tap a time, or use minus and plus for half hours.

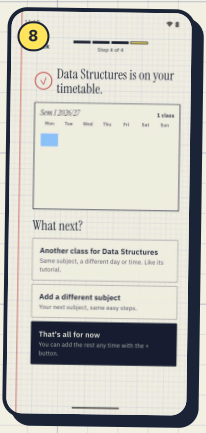

How long?
Pick a length, or set your own end time.

What kind?
Lecture, tutorial or lab. It only changes the label.

Where?
Add a room or building. It is optional.

Done!
Your class is on the timetable. Add more, or stop here.

CHAPTER 1

Today, your home base

1. **The big clock** shows the time, today's date and which week of the semester it is. In "Week 7 · A", the A is the kind of week.
2. **The day strip** lets you look at any other day. Tap a day to see its classes. A red dot marks today.
3. **The class you are in** turns dark and shows how many minutes are left, with a progress bar underneath.
4. **Gaps between classes** are marked FREE, along with how long the break lasts.
5. **NEXT** tells you which class is coming up and how long until it starts.
6. **The plus button** adds a class, an exam or an assignment.
7. **Settings** open from the settings icon, three small sliders in the top right corner next to the clock.
8. **The bottom bar** switches between Today, Week, Notes, Subjects and Wallpaper.

Tips tour. Four short tips point out the main buttons. You can replay them from Settings with *Show tips again*.

Lock screen offer. Say yes to set up your wallpaper now, or choose *Maybe later*.

You're all set. Tap *Open my timetable* and you are done.

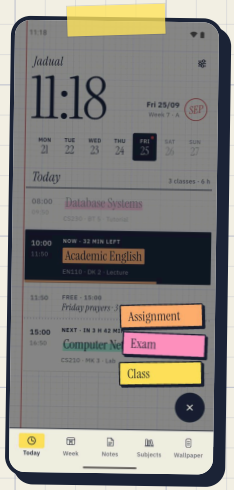

WEEKLY ROUTINE MODE

For Weekly routine mode, Today lists activities instead of classes (see Chapter 3).

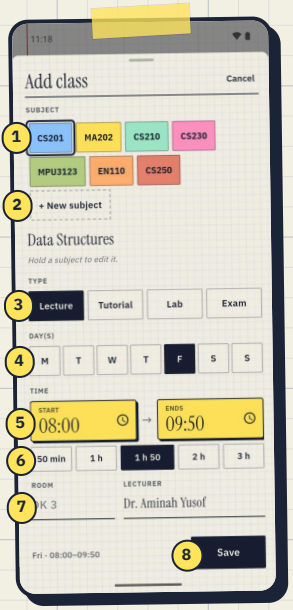

CHAPTER 1

Add anything with +

The plus button on Today and Week adds a class, an exam or an assignment. For Weekly routine mode, it offers Task, Event and Activity instead (see Chapter 3).

The + menu. Choose Assignment, Exam or Class.

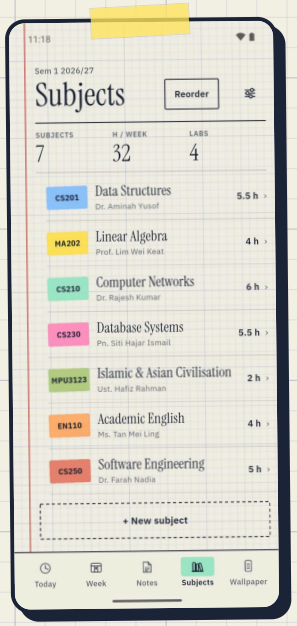

1. **Subject.** Choose which subject this class belongs to.
2. **+ New subject.** Use this when the subject is not on the list yet.
3. **Type.** Choose lecture, tutorial, lab or exam.
4. **Days.** Tap every day the class meets.
5. **Start and end.** Tap the yellow boxes to set the times.
6. **Quick lengths.** One tap sets 50 minutes, 1 hour, 1 hour 50, 2 hours or 3 hours.
7. **Room and lecturer.** Both are optional.
8. **Save.** For a class that skips some weeks, scroll down first to find *Repeats* (see Chapter 2).

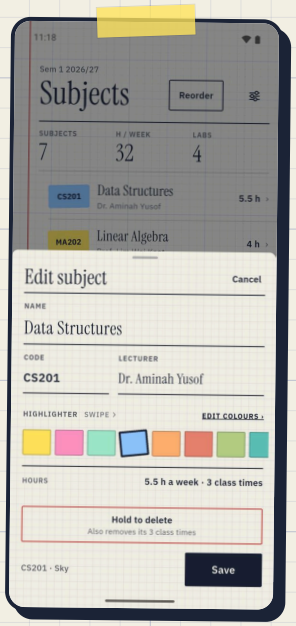

CHAPTER 1

Subjects and colours

Every class belongs to a subject, and every subject has its own highlighter colour. That colour follows it onto Today, Week, your widgets and your wallpaper.

The Subjects tab lists every subject with its hours per week.

Tap a subject to change its name, code, lecturer or colour.

Eight free colours

Yellow Sky Pink Mint Orange Sage Brick Teal

Eight more with Pro

PRO

Pro adds eight more colours, plus *Edit colours*, which lets you adjust each one to taste.

TIP

While you are adding a class, **hold a subject chip** to edit that subject without leaving the sheet.

WEEKLY ROUTINE MODE

For Weekly routine mode, this tab is called **Activities**. Each activity has a name, a colour and one or more times, and there are no lecturers or class types (see Chapter 3).

CHAPTER 2

Week and A/B weeks

The Week tab shows your whole week at a glance. If your classes alternate, Jadual calls the two kinds of week A and B.

WEEKLY ROUTINE MODE

For Weekly routine mode, there are no semesters or A/B weeks. Use the arrows to move between weeks, or tap the month to jump to a date.

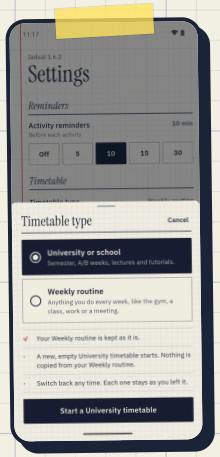

1. **The A | B switch** flips between week A (weeks 1, 3, 5…) and week B (weeks 2, 4, 6…). Turn it on or off in Settings, under *Timetable*.
2. **Today's column** has a grey background.
3. **Tap a class** to open it. Hold and drag to move it, or drag its round bottom handle to change its length.
4. **The red line** marks the current time.
5. **The plus button** adds a class from here too.
6. **Repeats.** Scroll down in the class sheet to choose *Every week*, *Week A* or *Week B*, or *Chosen weeks* for exact weeks.
7. **Hold to delete.** A quick tap does nothing, so a class cannot vanish by accident.
8. **Duplicate slot** copies the class, handy for subjects that meet more than once a week.

CHAPTER 3

Using Weekly routine mode

Weekly routine is for a life that repeats every week, not only for school. It asks fewer questions and shows everything as activities. The other chapters still apply, and this chapter covers what is different.

	University or school	Weekly routine
WHAT IT IS FOR	Lectures, tutorials and labs in a semester	Anything that repeats every week, such as the gym, work, a class or a meeting
WHAT YOU ADD	Subjects with classes	Activities, each with one or more times
THE EXTRA QUESTIONS	Semester, A/B weeks, lecturer, class type	None. Just the name, day, time and place
THE + MENU	Assignment, Exam, Class	Task, Event, Activity
THE WEEK TAB	Always shows the current week	Moves forward and back, with a month jump
THE SUBJECTS TAB	Called Subjects	Called Activities

Choosing the mode

Setup asks **What is this timetable for?** Choose *Weekly routine* and the rest of setup follows the routine questions.

You can change your mind later. In Settings, tap **Timetable type**. Each timetable is kept exactly as you left it, and nothing is copied from one to the other, so you can switch back any time.

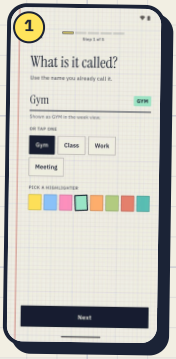

WEEKLY ROUTINE MODE

For Weekly routine mode, Settings hides the semester and A/B weeks, because a routine has no semester.

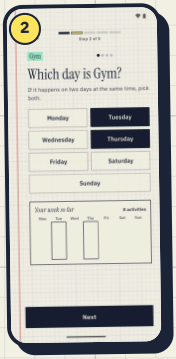

CHAPTER 3

Setting up your routine

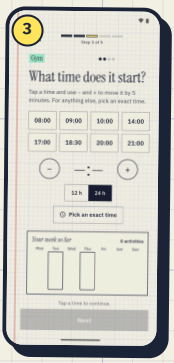

There are five short questions for each activity, and a **Your week so far** panel fills in as you answer.

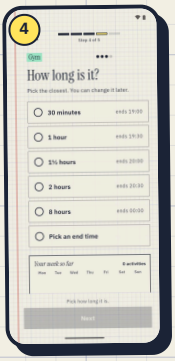

What is it called?
Type a name, or tap Gym, Class, Work or Meeting. Pick a highlighter.

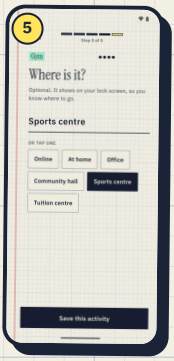

Which day?
Choose the day, or both days if it meets twice.

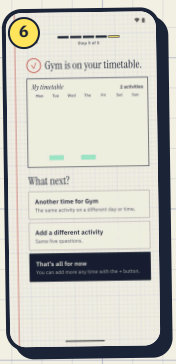

What time?
Tap a time, or use minus and plus to move by 5 minutes.

How long?
Choose from 30 minutes up to 8 hours, or set an end time.

Where is it?
Optional. Pick a place or type one. It shows on your lock screen.

Done!
Add another time, add a different activity, or stop.

Another time for Gym repeats the same activity on a different day or time. **Add a different activity** starts the five questions again.

CHAPTER 3

Day to day

Today, Week and the Activities tab work much like their University versions, with a few differences.

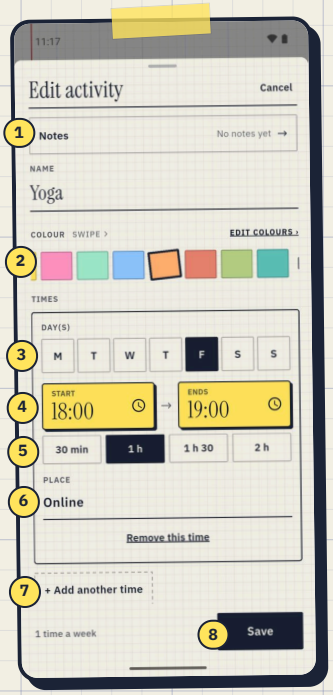

1. **Today** counts your activities and hours for the day.
2. **The activity you are in** turns dark, with the time left.
3. **The plus button** opens the Task, Event and Activity menu.
4. **The month name** opens a calendar so you can jump to any date.
5. **The arrows** move to the previous or next week.
6. **Tap an activity** to open it. Hold and drag to move it, or drag its round bottom handle to change its length.
7. **The Activities tab** lists every activity with its days and next time.
8. **+ New activity** is at the bottom of the list. Swipe left on an activity to delete it.

CHAPTER 3

Editing an activity

Tap any activity, on Today, Week or the Activities tab, to open it. One activity can have several times, for example a gym that meets on three days.

1. **Notes.** Keep notes for this activity. Notes are a Pro feature. PRO
2. **Colour.** Pick its highlighter.
3. **Days.** Tap every day it happens.
4. **Start and end.** Tap the yellow boxes to set the times.
5. **Quick lengths.** 30 minutes, 1 hour, 1½ hours or 2 hours in one tap.
6. **Place.** Type a place name, if you like.
7. **+ Add another time** gives the same activity a second slot, such as a different day with a different time.
8. **Save.** Your Today, Week, widgets and wallpaper update straight away.

WEEKLY ROUTINE MODE

For Weekly routine mode, there are no A/B weeks to choose from. An activity repeats every week.

CHAPTER 3

Tasks, events and activities

For Weekly routine mode, the plus button offers three choices. The difference is how often each one happens.

The three choices

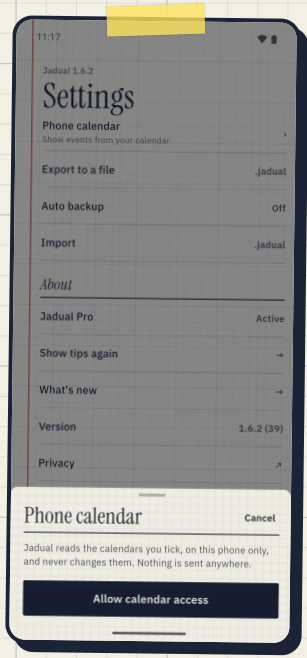

1. **Task** is something to hand in or finish, with a due date and a reminder.
2. **Event** is a one-off on a single date, such as a dentist appointment.
3. **Activity** repeats every week, such as yoga on Fridays.

Filling them in

An **event** asks for a name, a date, start and end times, a place and a colour. A **task** asks for a title, an optional activity, when it is due, and when to remind you.

CHAPTER 3

Calendar and reminders

Your phone calendar PRO

For Weekly routine mode, Jadual can also show events from your phone's calendar. Open Settings, then **Phone calendar**, and tap **Allow calendar access**.

Jadual reads only the calendars you tick, on your phone, and never changes them. Nothing is sent anywhere.

Activity reminders

In Settings, **Activity reminders** goes off 5, 10, 15 or 30 minutes before each activity, or not at all if you choose Off.

Starting a new routine

In Settings, **Start a new timetable** lets you pick the type first. Your current one moves to **Past timetables**, which comes with Pro. PRO

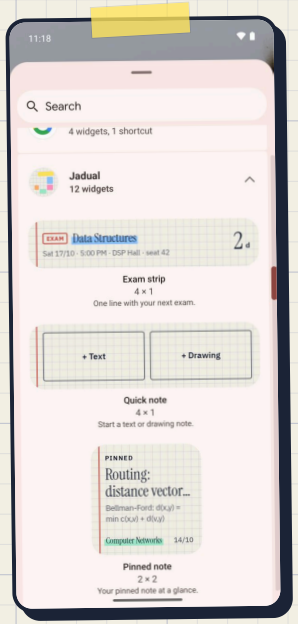

WEEKLY ROUTINE MODE

For Weekly routine mode, exams are not part of the timetable. Use a Task for a due date, or an Event for a one-off such as a test.

CHAPTER 4

Widgets on your home screen

A widget puts your timetable on your home screen, so you can see what is next without opening the app. Jadual offers twelve of them.

Adding a widget

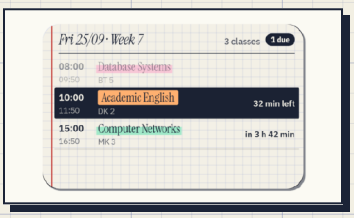

1. Touch and hold an empty spot on your home screen.
2. Tap **Widgets**, then search for *Jadual* or scroll until you find it.
3. Tap **Jadual** (it says **12 widgets**) to open the list.
4. Touch and hold the widget you want, then drag it to a spot on your home screen.

HEADS UP

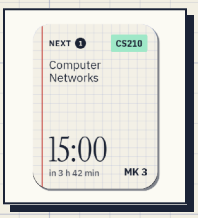

Phone brands word these steps differently. On some phones, for example, you reach *Widgets* through a plus button.

FREE **Today** is free for everyone.

PRO The other eleven come with Jadual Pro. Without it, they show a small card that says *Tap to unlock this widget*.

Today

Next class

no need to open the app!

CHAPTER 4

All twelve widgets

The widgets share the app's paper look and use your subject colours. Tapping a widget opens Jadual.

Next class PRO

Your next class and how long until it starts.

Today FREE

Today's classes, with the one running now.

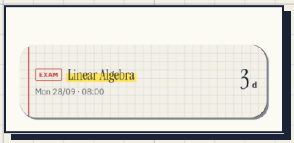

Week PRO

The whole week on graph paper.

Next exam PRO

Your next exam and the days left.

Exam strip PRO

One line with your next exam.

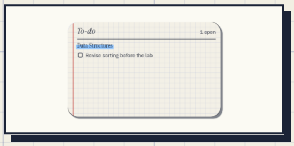

Exams PRO

Your next three exams and the days left.

Due PRO

Open assignments, the most urgent first.

To-do PRO

Open to-dos from your notes.

Latest notes PRO

Your newest notes, pinned first.

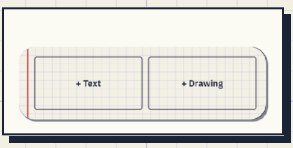

Revise PRO

The notes for your next exam.

Pinned note PRO

Your pinned note at a glance.

Quick note PRO

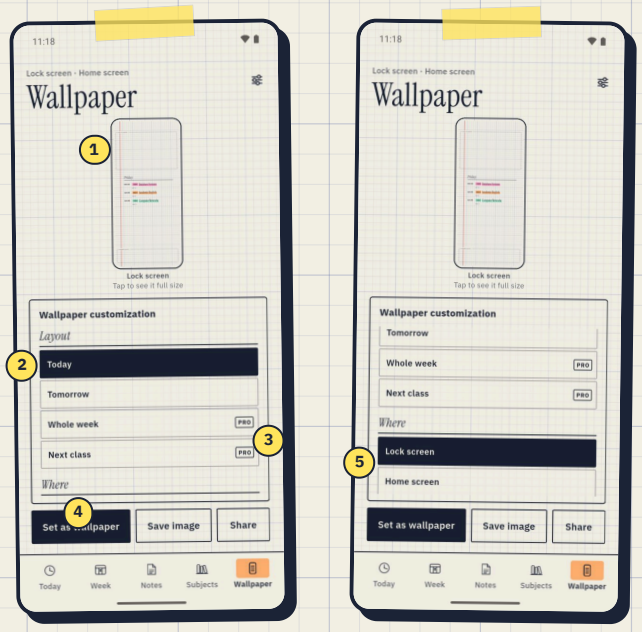

Start a text or drawing note.

The **Quick note** widget gives you *+ Text* and *+ Drawing* buttons, so a new note is one tap away. It is handy in the middle of a lecture.

CHAPTER 5

Wallpaper studio

Jadual can turn your timetable into a wallpaper for your lock screen or home screen. You design it on the Wallpaper tab, then set it with one tap.

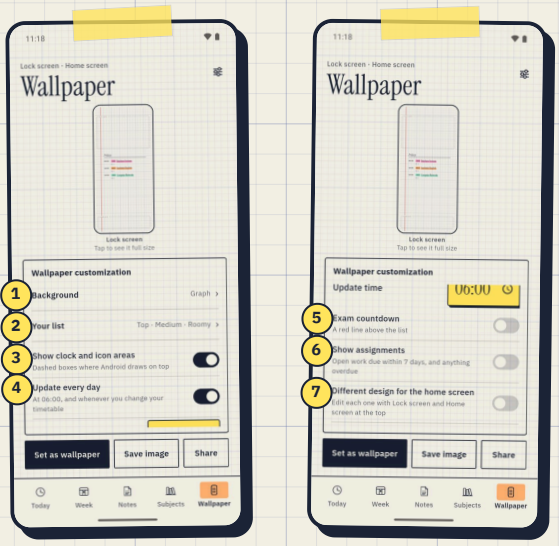

1. **The preview** shows what your wallpaper will look like. Tap it to see it full size.
2. **Layout.** Choose *Today*, *Tomorrow*, *Whole week* or *Next class*. Today and Tomorrow are free.
3. **Whole week** and **Next class** come with Pro, which is why they carry a PRO label.
4. **Set as wallpaper** applies your design. *Save image* keeps a copy, and *Share* sends it to someone.
5. **Where.** Scroll down in the panel to choose *Lock screen*, *Home screen* or *Both*.

CHAPTER 5

Make it yours

Scroll down in the customization panel for more options. Several of them come with Pro.

1. **Background.** Use a paper for free, or a photo of your own with Pro. PRO
2. **Your list.** Choose where the list sits (*Top*, *Middle* or *Bottom*), how large it is and how roomy each row is.
3. **Show clock and icon areas** draws dashed boxes where Android places the clock and icons, so you can keep your timetable clear of them.
4. **Update every day** redraws the wallpaper at the time you choose, and again whenever you change your timetable. PRO
5. **Exam countdown** adds a red line above your list. PRO
6. **Show assignments** adds open work that is due within 7 days, plus anything overdue.
7. **Different design for the home screen** lets you design the lock screen and the home screen separately. PRO

CHAPTER 5

Presets and saving

What you get

The result is a real picture of your timetable. Here it is on a real lock screen, with each activity in its highlighter colour.

Presets

Daily is the free preset. *Exam week* and *Quiet*, which uses a photo background, come with Pro. PRO

With the free plan you keep one setup. Pro lets you save as many presets as you like and switch between them with one tap.

Orientation and saving

Orientation switches the wallpaper design between portrait and landscape.

Save image stores a PNG in the Jadual folder inside Pictures. **Share** sends it to any app you like.

TIP

Choose your paper before you design the wallpaper. It borrows the paper's ruling, ink, fonts and highlighters (see Chapter 6).

HEADS UP

After you change the design, tap **Set as wallpaper** again so your phone uses the new version.

WEEKLY ROUTINE MODE

For Weekly routine mode, the *Next class* layout is called **Next activity**.

CHAPTER 6

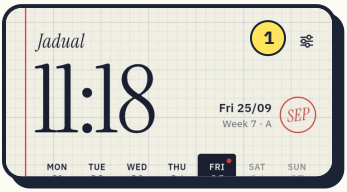

Eleven papers

A paper changes the whole look of Jadual: the ruling, the margin, the ink, the fonts and the highlighters. Your timetable, widgets and wallpaper all follow the paper you choose.

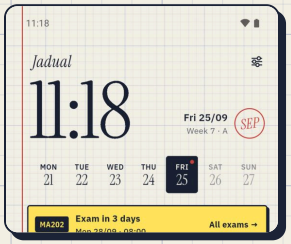

Graph and Graph dark are free. The other nine come with Jadual Pro.

CHANGING PAPER

Open **Settings** with the settings icon: the three small sliders in the top right corner of Today, next to the clock.

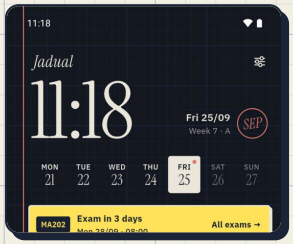

Then tap **Jadual Papers**, tap a paper to see it up close, and tap **Apply**.

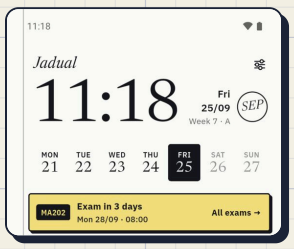

Graph FREE

The default. Graph paper and a red margin.

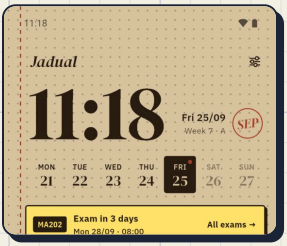

Graph dark FREE

Graph paper in the dark.

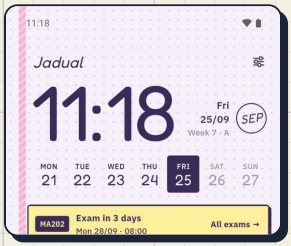

Ledger PRO

Plain and quiet. No grid, no red.

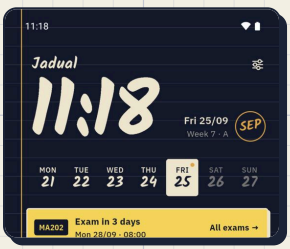

Kraft PRO

Brown card stock, dot grid and a red pencil.

Washi PRO

Soft lilac dots and a strip of washi tape.

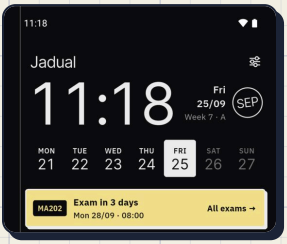

Ulangkaji PRO

Dark and ruled, made for late revision.

CHAPTER 6

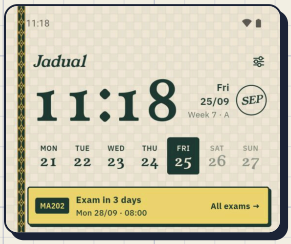

More papers

The last four papers, Kopitiam, Marmar, Jubin and Papan menu, make up the **Kopitiam set**. They are inspired by Malaysian coffee shops: the marble tables, the tiled floor and the drinks board above the counter.

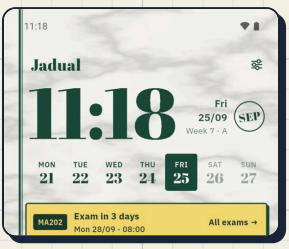

Arang PRO

Near-black and flat, with just ink and a hairline.

Kopitiam PRO

Cream, kopitiam green and a songket band.

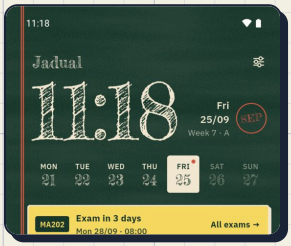

Marmar PRO

White marble with soft grey veins.

Jubin PRO

Cream octagon tiles and warm brown ink.

Papan menu PRO

A green drinks board with cream lettering.

TIP

Your widgets and wallpaper follow the paper you choose, so it is worth trying a few. Switching is free and does not change your timetable.

CHAPTER 7

Assignments and exams

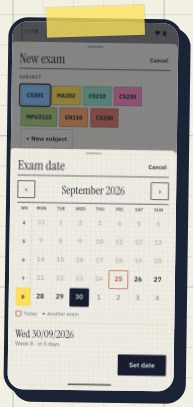

Assignments

Tap **+**, then choose **Assignment**.

1. **Title.** Write what is due, such as “Lab report 3”.
2. **Subject.** Pick the subject it belongs to, or leave it on *No subject*.
3. **Due.** It starts as *Next class*. You can also choose an exact date and time.
4. **Remind me.** Choose *Evening before*, *2 days before*, *Off* or *Custom*.

Once saved, it appears on Today as a strip. Tap **Mark as done** when you finish. Past its due date, it gets a red tag.

Exams

Tap **+**, then choose **Exam**. Pick the subject, the date, and the start and end times.

The date picker shows **week numbers** down the side, and a small dot on days that already have an exam.

Jadual reminds you at 20:00 the evening before, and again 10 minutes before the exam. PRO

TIP

In the class sheet, choosing **Exam** under *Type* adds an exam too.

WEEKLY ROUTINE MODE

For Weekly routine mode, an assignment is a **Task** and there are no exams (see Chapter 3).

CHAPTER 7

Counting down

1. **The exam strip.** Today shows your next exam and how many days are left.
2. **The assignment strip.** Anything due soon sits directly below it.
3. **All exams.** Tap it to open the Exams list, which separates Upcoming and Past exams and counts down to each one.

Under each exam, **+ Add a note** starts a note for that subject, which is useful for revision. PRO

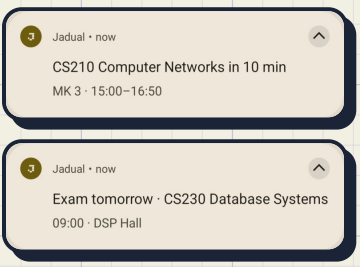

Reminders

Reminder settings are at the top of Settings. Open Settings with the settings icon, the three small sliders in the top right corner of Today.

- **Class reminders** go off 5, 10, 15 or 30 minutes before each class, or not at all if you choose Off. FREE
- **Earlier reminders** warn you before an exam, anywhere from 1 day to 2 weeks ahead. You can pick several. PRO
- **Reminder time** decides when exam and assignment reminders arrive. The default is 20:00.

Android asks for permission to show notifications. If you said no, Chapter 10 explains how to fix it.

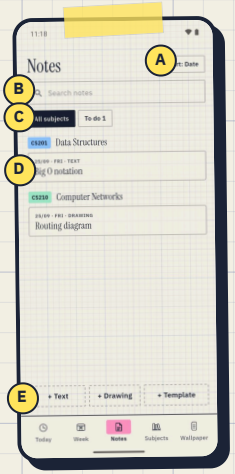

Here is how reminders look

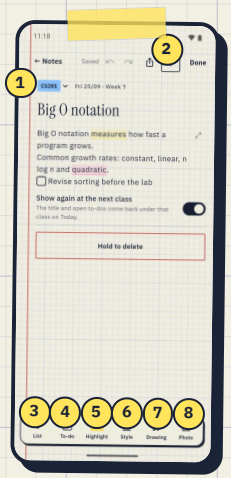

CHAPTER 8

Notes PRO

Notes are where you keep what you learn in class. Each note belongs to a subject, so you can find it again under the right class.

The toolbar

3. **List** adds bullets or numbers.
4. **To-do** adds a box you can tick off.
5. **Highlight** marks the text you have selected.
6. **Style** gives you bold, italic, underline and strikethrough.
7. **Drawing** places a sketch inside the note.
8. **Photo** adds a picture from your camera or gallery.

The list

- **A** **Sort** your notes by date, last edited or title.
- **B** **Search** looks through all of your notes.
- **C** **Filters** narrow the list to one subject, to notes with open to-dos, or to drawings.
- **D** **Tap a note** to open it.
- **E** **New notes** start from *+ Text*, *+ Drawing* or *+ Template*.

The editor

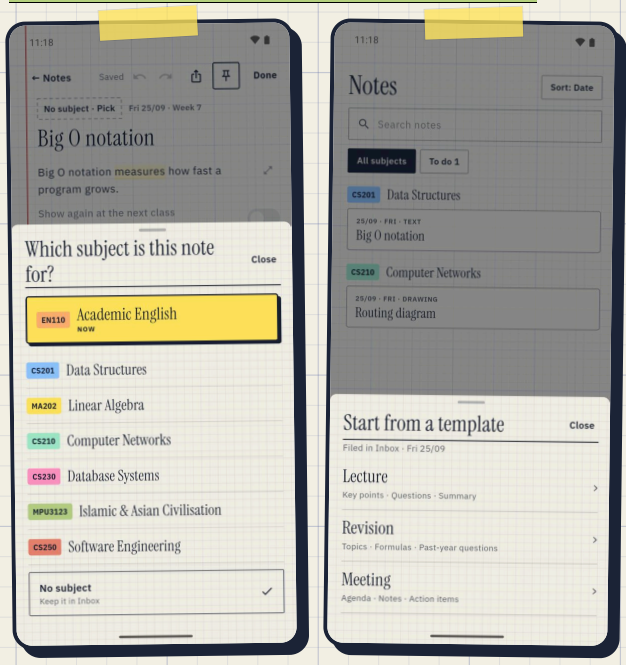

1. **The subject chip** shows which class the note belongs to. Notes without a subject wait in the *Inbox* until you pick one.
2. **Share and pin** are at the top. A pinned note can appear on the Pinned note widget.

WEEKLY ROUTINE MODE

For Weekly routine mode, notes belong to activities, and the filter reads **All activities** (see Chapter 3).

CHAPTER 8

Notes that find you

Pick a subject

Tap the chip at the top of a note. The class that is happening right now is marked **NOW**, which makes it quick to choose.

Start from a template

Lecture gives you Key points, Questions and a Summary. **Revision** offers Topics, Formulas and Past-year questions. **Meeting** sets up an Agenda, Notes and Action items.

Show again at the next class

Switch this on and the note's title and any open to-dos return **under that class on Today** the next time it happens. It is a good way to remember things like "bring the lab report".

Finding your open to-dos

The *To do* filter on the Notes list shows only the notes that still have unticked boxes, along with how many there are.

Deleted by accident?

If you delete a note, it stays in **Recently deleted** for 30 days. After that it is gone for good.

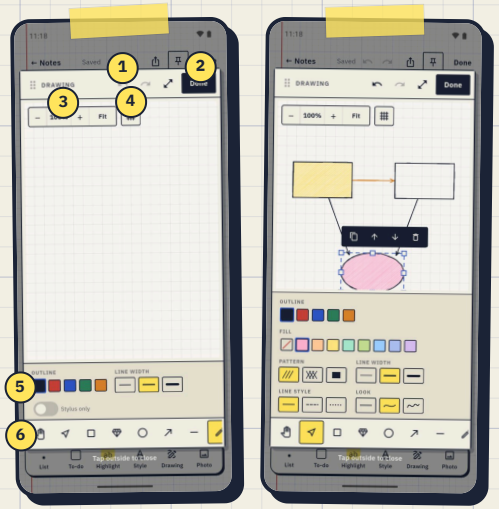

TIP

If Pro is ever switched off, Jadual keeps your notes.

CHAPTER 8

The Drawing canvas

Use the canvas to sketch freehand or to build a diagram from shapes. It is one endless canvas for both.

1. **Undo and Redo** sit at the top.
2. **Done** closes the canvas, and **Full screen** gives you the whole display to draw on.
3. **Zoom.** Use minus and plus to zoom between 5% and 800%, or tap *Fit* to frame everything you have drawn.
4. **Background.** Choose graph, dots, lines or a blank page.
5. **Outline colour and line width** appear as soon as you pick a tool.
6. **The tools.** Scroll along the bar for Hand, Select, Rectangle, Diamond, Ellipse, Arrow, Line, Pen, Marker, Text and Eraser.

Shapes and arrows

- Drag with a shape tool to draw that shape.
- Arrows stay attached to the shapes they connect, and you can curve them.
- Select a shape to change its outline, fill, pattern and line style. You can give it a hand-drawn look, or keep the lines straight and tidy.
- The small bar above a selected shape lets you duplicate it, move it forward or back, or delete it.

Using a stylus?

Turn on **Stylus only** in the tool panel. Your finger then moves the canvas around, and only the stylus draws.

CHAPTER 9

Backup and moving phones

Jadual has no account and no cloud, so your timetable lives on your phone. These options let you keep a copy and move to a new phone. All are free except the semester archive.

In Settings, under Data

Export to a file creates a .jadual file that you can keep or send to a friend. FREE

Import opens a .jadual file. Jadual asks before it does anything, and your current semester moves to Past semesters. Nothing is deleted. A .jadual file from a friend also opens straight from WhatsApp, Telegram or Files. FREE

Auto backup saves a copy to a folder you choose, when you leave Jadual after a change, but never more than once an hour. Notes and their photos are included, and nothing leaves your phone. FREE

Archive semester turns a finished semester read-only, and **Past semesters** keeps it. PRO

MOVING TO A NEW PHONE

1. Copy the backup files to the new phone, or send them to yourself (WhatsApp, Telegram, email or Drive).
2. Install Jadual on the new phone.
3. Open Settings, Data, Import and pick each file. There is one file per semester.

WEEKLY ROUTINE MODE

For Weekly routine mode, **Start a new timetable** and **Past timetables** take the place of Archive semester and Past semesters.

CHAPTER 10

Quick fixes

Most problems have a quick fix. Here are some common ones, with what to do about each.

My reminders never ring	Open Settings in Jadual. If you see **Reminders cannot ring**, notifications are switched off for the app. Tap **Turn on** and allow them.
A reminder came a few minutes early or late	On newer versions of Android, the phone may delay or group alarms to save battery, so a reminder can arrive a few minutes off.
My wallpaper stopped updating after I edited my lock screen	On some phones, editing the lock screen (for example its clock) replaces the wallpaper Jadual set. We saw this on a phone running ColorOS. Open the Wallpaper tab and tap **Set as wallpaper** once, and the daily update carries on.
A widget shows a Pro card	Only the Today widget is free. The others show a Pro card until you unlock Jadual Pro. Tap the card to see what Pro includes, or add the Today widget instead.
A class is missing from my Week	Look at the **A | B** switch at the top of the Week screen. A class set to repeat on *Week A* or *Week B* only appears in that kind of week.
I can't edit an old semester	Archived semesters are read-only on purpose. You can export one to a file, or start a new semester for your current classes.
I chose the wrong timetable type	You can change it later. Open Settings and tap **Timetable type** to switch between University or school and Weekly routine.

STILL STUCK?

Write to **jadual.support.app@gmail.com** and tell us which phone you have and what happened. That helps us work out the problem much faster.

THAT IS THE WHOLE BOOK

Type it once. See it everywhere.

Today, Week, widgets, wallpaper, notes and exams all come from the one timetable you typed. Now go and make it look good.

share it with your class!
